

TESTIMONIAL

“Oticon Duals deliver excellent speech understanding - warmer sound”.

Mr. Jörg Schattner, independent Hearing Care Professional in Germany, knows exactly what clients need, because he uses hearing aids too.

“I’ve been wearing Oticon Delta for two years now and recently changed to Duals. Adjusting to them was very easy. They are cosmetically attractive and the sound quality is warmer, comfortable and natural. Another advantage is that Dual runs on size 312 batteries, which prolongs the battery lifetime enormously.”

In Jörg Schattner’s experience, Oticon devices are characterised by immediate user acceptance and excellent speech understanding. “Oticon solutions have worked well for me, and my clients are of the same opinion.”

“They are cosmetically attractive and the sound quality is warmer, comfortable and natural.”
